

Deepak R

Quality-oriented professional with more than 2 years of experience in Application support and Test Environment management aiming for an opportunity where I can leverage my skills for the success of the organization and pursue my learning and career goals.

EXPERIENCE

Infosys Limited, Bengaluru - *System Engineer*

May 2021 - PRESENT

Roles and Responsibilities:

Environment and Release Analyst

- Involved in building the test server for project team to develop/testing and to support UAT, SIT and NFT in accordance with the agreed-upon SLA.
- Pulling the codes (UNIX, SQL, and windows components) from bit bucket/Gitlab and deploying it into Test environment created by Agile Development teams.
- Executing batches that involves a variety of DB operations to carry out transactional data movement in the system and debug any issues.
- Involved in deploying third party EAR files (Application deployment) in WebSphere Application server and performing health checks in IBM WASconsole.
- Worked on production implementation as part of agile releases, including deploying multiple components and supporting a successful go-live. It requires careful planning, coordination, and execution to ensure that all components are deployed in the right order.
- Creating different test users in accordance with their needs and debugging if any problems arise.
- Bill of material (BOM) preparation, Artifactory creation and code placement before production implementation.
- Propagating the changes into all the test environments to maintain equal code base once the release is successfully implemented in production server.
- Worked on few automated scripts to lessen the amount of manual task we do on a daily basis.
- Performed DBA activities such as performing health checks, backup, upgrade and restore activities. And managed database creation for various test environments such as UAT, SIT and NFT.
- Interacting with the testing team to comprehend the user stories that will be tested over multiple testing cycles.
- As SME for resolving various functional issues reported by testing team.
- Attending Daily standup meeting with Scrum Master to update the status of work and gathering business needs.
- For a few team members who just joined, information and supporting materials were developed.
